# Pool safety

Citing government data showing that drowning is the leading cause of accidental death for children between the ages 1 and 4 in the U.S., the N.J. State Police have issued an advisory on swimming pool safety.

According to a report by the U.S. Consumer Product Safety Commission, the NJSP statement noted, close to 400 pool and spa drownings involved children younger than 15, with more than 75% involving children under 5.

Many of these tragedies can be avoided if pool owners take some protective measures and follow some common-sense recommendations:

The most important step of prevention is constant adult supervision. Even if there are children in the pool who know how to swim, someone should be designated to watch the water at all times.

If your child can't swim, teach them how or get them lessons if you can, and if you own a pool, take the time to learn CPR.

As for securing a home pool:

\* The pool should be surrounded by a fence at least 4 feet high

\* The fence should have a self-closing and self-latching gate with a lock

\* In-ground pools should be completely fenced in

\* Install a rigid safety cover for your in-ground pool

In addition, the NJSP noted, there are a variety of underwater motion alarms, surface movement alarms, and child wristband monitors that sound an alarm when the wristband gets wet.
